

**Dr. Jennifer Vail, Tribologist
DuPont, Wilmington**

Tribology and a Sustainable Future

Tuesday, April 13, 2021

Lecture 12 noon | Zoom link via [my.Gonzaga.edu/seas](https://my.gonzaga.edu/seas)

Those without Gonzaga email accounts may request access at seas@gonzaga.edu

Learn how the understanding of friction, wear, and lubrication unlocks advances to reduce energy, emissions, and waste.

- Why tribology matters
- Examples and case studies demonstrating tribology's impact

DR. JENNIFER VAIL

Originally from Florida, Dr. Vail studied mechanical engineering at the University of Florida, where a combined passion for mechanics and materials led to her PhD studies in polymer tribology. Prior to joining DuPont, she worked as a researcher at Imperial College London and the University of Sheffield.
